

## **Sahara Star initiates safety program “Safe Me Safe We”**

Sahara Star initiates safety program “Safe Me Safe We” to educate & create awareness about health measures amongst its team members, that are been put into place for their safety and well-being.

Hotel Sahara Star will be re-starting its operations in the coming weeks and to make sure that its team is safe and protected the Hotel has undertaken several steps. The team will be now equipped with masks and gloves at all times, along with making sure that the social distancing norms are being maintained. The team shall also undergo several training sessions prior to re-starting the property.

The Hotel has launched its “ Safe Me Safe We” Program for its team members to ensure that they are well trained and equipped to service our guests and take care of themselves and their loved ones.

Safety starts at home, the hotel has urged it’s team to wear a mask at all times, follow social distancing, use alcohol based hand sanitizers and use the 20 seconds hand wash technique.

Taking a safe ride to work: Hotel Sahara Star has suggested its associate to prefer travelling in their private vehicle and tap to check for essentials like wearing a mask, carrying a sanitizer, sanitizing touch points after and before use, carrying official IDs, self-checking temperature and visiting a doctor in case of a high temperature and importantly ensuring a safe ride while renting a ride.

Making your day at work secure, complying with temperature checks at entry points, utilisation of sanitizer after touching door knobs and elevator buttons or using elbows to open doors. Take stairs to upper floors whenever possible if not follow social distancing in elevators and also use sanitization methods on all tools before and after usage.

Precautions to be taken while working, e-meetings will be the new way to brief the team, being on the designated floor and moving around less frequently and limiting the amount of entries and exits within the property.

Bidding a hale goodbye for the day end, doing a tap check for essentials like masks and sanitizers on the way back home will be a norm, while reaching home asking a family member to keep the door open and leaving all baggage outside the house on arrival. Sanitize the belongings before taking them inside and shower immediately after putting the mask and clothes for a wash.

Tips on sanitising the correct way, clean the surface with a dry cloth to collect dust and debris, and spray soapy water after which use a wet cloth to clean the surface again. Finally use a sanitizer or disinfectant to make the surface squeaky clean.
