

STAAH Platforms Ready To Meet GST Changes In India

STAAH is among the first providers of distribution technology that has completed such a complicated update in time. As per GST rules, the taxes have been applied on the gross tariff since the 1st of July. No GST is applicable to room tariffs below INR1000 per day. Room rates between INR1000 and INR 2500 are subject to a 12% GST; between INR 2500 and INR 7500 are subject to 18% GST; and those above INR 7500 are subject to 28% GST.

These changes are expected to have a far-reaching impact on the hospitality industry, especially the luxury sector. All STAAH's products, including the channel manager and booking engine are updated to reflect this change. Apart from ensuring smooth processing, the update will reduce any manual tax calculations errors, enable easy generation of precise GST reports and help deliver GST compliant receipts.
