

## **Domestic travel sees 300% rise from pre-covid levels**

Hotels that are witnessing full occupancy might have to wait longer to go back to their pre-pandemic in terms of pricing level.

“Most hotels have been affected by the pandemic, including the five-star properties. As far as occupancy is concerned, hotels are full but there is remarkable drop in room prices. If things remains positive as they are right now, pricing will reach pre-Covid levels by mid 2023”, said Mr. Gurbaxish Singh Kohli, Vice-President, Federation of Hotel and Restaurant Associations of India.
